Description		
<p>Hi,</p> <p>I often hear that people forget to click the "save" button when they digitize for larger projects. Especially on windows QGIS craches from time to time and it would be nice to have an option in the "Settings" - "Option" - "Digitizing" tab to define a regular autosave, e.g. every 2 or 5 minutes.</p> <p>Regards, Otto</p>
