<b>Category:</b>	Map Legend	
<b>Pull Request or Patch supplied:</b>	No	
<b>Easy fix?:</b>	No	
<b>Description</b>  I think that it will be very positive for QGIS-users to add:  <ul style="list-style-type: none"><li>- List of last used styles of labels, map colours etc. (it will be faster than loading it every time)</li><li>- Easier adding north arrow (now arrows are together with other images, so we need more time to find proper or we need to manually select proper image file).</li></ul>

- % Done changed from 0 to 50
- Status changed from Open to Feedback

Hello, bug triage...

with QGIS 2.13 (and previous versions), you can copy/paste styles between layers and it should fix your style list problem .

For colors, there is the recent colors group and it should fix your color last used problem.

FFor north arrows, they can be added as images on the composer but I do agree that the "Search directories" group box should display SVG groups to easily spot the arrows.
