

QGIS Application - Bug report #4161

Adding WMS layers through file browser: nothing displayed at first

2011-08-11 05:37 AM - Paolo Cavallini

| Affected QGIS version:  |               | Regression?: No              |
| Operating System:   |               | Easy fix?: No                |
| Pull Request or Patch supplied:   |               | Resolution: worksforme       |
| Crashes QGIS or corrupts data:  |               | Copied to github as #: 14138 |
| Description   |               |                              |
| When adding a WMS layer by double-clicking, the layer is loaded on the legend, but not displayed on the canvas; zooming or panning solves it. |               |                              |

History

#1 - 2011-08-12 03:37 PM - Martin Dobias

I cannot reproduce. WMS layers are shown as soon as they are added, no need to zoom/pan. Does that happen to you with all servers?

#2 - 2011-08-12 09:42 PM - Paolo Cavallini

- Resolution set to worksforme
- Status changed from Open to Rejected

Cannot replicate it either - might have been a temporary network problem - sorry about the noise
