

# QGIS Application - Bug report #4165

## File browser: does not shows GRASS layers

2011-08-11 07:12 AM - Giovanni Manghi

<b>Status:</b> Closed	
<b>Priority:</b> Normal	
<b>Assignee:</b> Martin Dobias	
<b>Category:</b> Data Provider	
<b>Affected QGIS version:</b>	<b>Regression?:</b> No
<b>Operating System:</b>	<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b>	<b>Resolution:</b> worksforme
<b>Crashes QGIS or corrupts data:</b>	<b>Copied to github as #:</b> 14142
<b>Description</b>	
If I'm no wrong the standalone browser shows correctly the GRASS layers available into a Mapset. The browser integrated now in QGIS does not, as browsing a Mapset folder it just shows the files in it.	

### History

#### #1 - 2011-08-12 02:44 PM - Martin Dobias

For me both QBrowser and integrated browser show grass folders correctly: both as GRASS data collections and directories.

(They share the code for that functionality so the tree should be exactly the same)

#### #2 - 2011-08-13 05:09 AM - Giovanni Manghi

- Resolution set to worksforme

- Status changed from Open to Closed

It doesn't work in my Ubuntu 10.04 installation but works fine Under Ubuntu 11.04 and Windows.
