Description

The legend of bar graphs / pie does not appear in print composer, by the way would be interesting if the labels were displayed along with graphics

- Subject changed from Overlayer plugin to Diagram overlays do not show in print composer

- Status changed from Open to Closed

- Resolution set to invalid

It works in qgis trunk. Labels and diagrams do also show fine together in trunk.

Everything looks fine in the composer window but image/SVG output is not ok. Only some diagrams are contained in the output and their positions are off too.
