Crashes QGIS or corrupts data: No	Copied to github as #: 14231
Description	
<p>The attached project and layer shows several problems using old and new symbology plus old with old and new labels.</p> <ol style="list-style-type: none">1) Rotation of (old) label is anticlockwise, but symbols rotate anticlockwise - they both could go the same way.2) New label doesn't rotate3) Rotation field for new label needs values for position (distance, X & Y) before rotation is enabled4) Old label doesn't centre text on anchor point - too low vertically
