QGIS Application - Bug report #4301
Composer 'Lock Layers for map item' forgets layers when adding new layer

Crashes QGIS or corrupts data:		**Copied to github as #:**	14238

Description

I have 3 composers set up with a map on each. Each map shows different layers, achieved by using the 'lock layers for map items' checkbox.

When I add a new layer to my project, the composer maps forget what layers are supposed to be locked for that window and turn some layers off.

I then have to go through each composer and re tell it which layers to lock.

Windows XP and QGIS 1.8 (67df2e) OSGEO4W.

History

#1 - 2011-09-22 08:00 AM - Nathan Woodrow

- Resolution set to invalid

- Status changed from Open to Closed

Please check using the latest version from OSGeo4w as this has been fixed in commit:820469f4b1
