Still true? Just tested with latest master and get both PDF map and report. Maybe this true only in some use cases?

yes, still true on latest master: the report is ok, the "generate pdf map" creates an empty pdf.

There's a few components to this:

1. The "Generate pdf map" and "Generate pdf report" settings keep getting cleared
2. The page size for the map is not correctly set. It's initially set to 0x0, which triggers this bug. You can set it to a new size from the georeferencer properties, which fixes the map export, but this change only applies once and gets overwritten if you reopen the configure dialog.

thanks for the heads up. The georeferencer would need some support and it is pretty buggy.
