QGIS Application - Bug report #4336
Buffered text results in large PDF file sizes

2011-09-28 01:50 PM - Marc Pfister

Status:	Closed		
Priority:	Normal

Pull Request or Patch supplied:		**Resolution:**	duplicate
Crashes QGIS or corrupts data:		**Copied to github as #:**	14273

Description

A map exported from the composer as PDF will be several times larger if the labels in the project have buffers.

For example, a simple map that exports with unbuffered text to a 1.7 MB PDF will become a 17 MB PDF when the labels are buffered.

This is on 1.7.0 on OS X Leopard.
