

QGIS Application - Bug report #435

default identification of point area and perhaps ligne depending zoom

2006-12-07 09:16 AM - anonymous -

Status: Closed	
Priority: Low	
Assignee: Gary Sherman	
Category: Build/Install	
Affected QGIS version:	Regression?: No
Operating System: Windows	Easy fix?: No
Pull Request or Patch supplied:	Resolution: duplicate
Crashes QGIS or corrupts data:	Copied to github as #: 10494
Description	
on version of that day 2006/12/07 it's possible to read .DBF informations with clic on point or area (and perhaps line) only if points are enough far each others and for areas if they are big enough
