

QGIS Application - Bug report #442

display not updated when re-arranging layers order

2006-12-11 11:23 AM - Redmine Admin

Status: Closed	
Priority: Low	
Assignee: Marco Hugentobler	
Category: Map Legend	
Affected QGIS version:	Regression?: No
Operating System: Debian	Easy fix?: No
Pull Request or Patch supplied:	Resolution: fixed
Crashes QGIS or corrupts data:	Copied to github as #: 10501

Description

While re-arranging layers order, the user has to release the mouse exactly over some layer already present on the list. If he fails to, the display is not updated although the order of layers has changed.

1. add 2 layers
2. drag the top layer to the bottom - but don't release the mouse key, until the mouse pointer, is few pixels below the the last layer on the list (relase the mouse eg. where the "!!!" is, on the attached screendump)
3. see how the display is not updated; pressing Refresh doesn't help
