<b>Pull Request or Patch supplied:</b>		<b>Resolution:</b> worksforme
<b>Easy fix?:</b>	No	<b>Copied to github as #:</b> 14367
<b>Description</b>  hello! It would be a great feature if the "Avoid intersection" in the "Snapping Options" could work even between different layers and not just within one. For example, instead of just having one check box, it could have a drop down list with every vectores, and we could choose one or more layers that we would not like to intersect and keep our vector perfectly snapped with the rest of our layers. best regards, Pedro Ferreira

- Resolution set to worksforme
- Status changed from Open to Closed

AFAIK it is already possible.

#2 - 2011-11-02 04:32 AM - elcuco -

Hello Paolo,  
Ok, thanks! I've checked it out and in fact it works!
