

QGIS Application - Bug report #444

low resolution in print composer and in the output (svn 6261)

2006-12-12 02:14 AM - lami-faunalia-it -

Status: Closed	
Priority: Low	
Assignee:	
Category:	
Affected QGIS version:	Regression?: No
Operating System: All	Easy fix?: No
Pull Request or Patch supplied:	Resolution: worksforme
Crashes QGIS or corrupts data:	Copied to github as #: 10503
Description	
<p>The resolution of the canvas in the print composer is very low if compare to the desktop canvas. The pdf created doesn't correspond to the view (not only in extension) while in the image created (es. png) the resolution of the raster is good but the resolution of the vectors is very low.</p>

Are you talking about lines and polygons or about point symbols?

Radim

#2 - 2006-12-12 09:14 AM - anonymous -

Both

Leonardo

to me the problem seems serious enough to require a fix before the release of 0.8

I agree. The current look is a regression on how it used to appear.

#5 - 2006-12-18 12:02 AM - Gavin Macaulay -

- Status changed from Open to In Progress

#6 - 2006-12-18 02:06 AM - Iami-faunalia-it -

Also the other vector elements (legend, text, scale bar...) have the same problem: low resolution. This situation was not present in the past development versions

#7 - 2006-12-18 07:45 AM - scarselli-faunalia-it -

When I give the print order I obtain the following error "The selected paper size does not match the composition size" and nothing can be printed (with all my printers)

#8 - 2006-12-18 11:46 AM - Gavin Macaulay -

- Status changed from In Progress to Open

#9 - 2006-12-28 07:27 AM - Redmine Admin

- Status changed from Open to Closed

- Resolution set to worksforme

it seems fixed in the current version (svn 6322). Closing it - please reopen it if it's still there for you.

#10 - 2009-08-22 12:46 AM - Anonymous

Milestone Version 0.8 deleted
