Easy fix?:	No	**Copied to github as #:**	14378

Description

I suggest to add another option to those listed in #2930, to let users create a resampled raster setting the output pixel size. Actually it can be done maually setting the -tr option to gdal_translate (e.g. inside the Gdal Translate tool).
We could provide a new tool dedicated to it (Gdal Resample?) or add an option to the Gdal Translate widget.
