

QGIS Application - Bug report #4474

Raster Calculator makes QGIS crash if output file exists

2011-11-01 04:56 AM - alobo -

Status: Closed	
Priority: High	
Assignee:	
Category: Rasters	
Affected QGIS version: master	Regression?: No
Operating System: ubuntu 10.04	Easy fix?: No
Pull Request or Patch Applied: No	Resolution: worksforme
Crashes QGIS or corrupts data: Yes	Copied to github as #: 14401
Description	
Instead of prompting whether the file has to be overwritten, Raster Calculator crashes if output file exists.	
Agus

- Status changed from Open to Feedback

- Affected QGIS version set to master

- Crashes QGIS or corrupts data set to Yes

Hi Agus,

I tested on both Windows and Linux with qgis-master ans 1.7.3

I see no crashes at all.

When selecting the output name if you go pick the already existing file QGIS asks if you want to replace it. If just the name is written then QGIS silently overwrites it- The latter seems to me a bug, but it seems not causing crashes.

Please test again and report back.
