#### Description

I got into this time ago after noticing a extremely slow-to-render exported PDF file: maybe this has something to do with that. Since I'm not an expert on Postscript, I will copy here first lines of a typical exported PDF PS code produced by QGIS1.7.1: maybe some PS guru can comment on this:

Hello, bug triage...

do you still have problems with PDF generation on recent QGIS versions (2.12 or master) ?

If it is the case can you join a recent project file (with the data) with a composition that is very long to be exported to PDF ?

### #7 - 2015-12-26 06:36 AM - Giovanni Manghi

- Resolution set to not reproducible

- Status changed from Feedback to Closed

closing for lack of feedback, please reopen if necessary.
