

QGIS Application - Feature request #4606

Data-defined label priority for new labeling

2011-12-04 04:09 AM - Anita Graser

Status:	Closed	Resolution: Copied to github as #: 14511
Priority:	Normal	
Assignee:		
Category:	Labelling	
Pull Request or Patch supplied:	Yes	
Easy fix?:	No	
Description		
<p>A really useful feature for new labeling engine would be to add a data-defined Priority property.</p> <p>Currently, it's only possible to set one priority per layer. When used on e.g. a road network layer, it is not possible to tell QGIS to first label high-level roads. Instead, you might end up with labels on some minor roads but none on the high-level roads.</p>
