

QGIS Application - Bug report #4629

Error of Georeferencing with Japanese file-name

2011-12-10 08:12 PM - Masaru Narazaki Narazaki

Status: Closed	
Priority: Normal	
Assignee:	
Category: C++ plugins/Georeferencer	
Affected QGIS version: master	Regression?: No
Operating System:	Easy fix?: No
Pull Request or Patch supplied: No	Resolution: end of life
Crashes QGIS or corrupts data: No	Copied to github as #: 14530

Description

If we Japanese chose no check of "Load in QGIS when done" of defining the transformation settings like adding first JPEG file including Japanese file_name at Georeferencing, we can get correct result. But if we chose the check of "Load in QGIS when done", "error of invalid data source" showed second JPEG file appears, (though we can get correct output georeferencing file.) Please take out the error of second JPEG file.
