Easy fix?:	No	Copied to github as #:	14533
Description When using the map print composer, the option for rotating a placed map item increments in whole degrees. It would be advantageous to have this increment to at least hundredths of a degree (e.g. 0.87). I found it impossible to rotate from UTM grid north to true north when composing my UTM map for print output. Is it a limitation imposed solely by the composer GUI input field, or does the rotation code require (at this time) whole degrees for rotation? Larry

History

#1 - 2011-12-16 02:07 PM - Giovanni Manghi

- Category set to 33

#2 - 2011-12-16 02:09 PM - Giovanni Manghi

- Target version set to Version 1.7.4

#3 - 2011-12-19 01:52 PM - Marco Hugentobler

- Status changed from Open to Resolved

Changed precision in master (will be backported to 1_7 and 1_8)

#4 - 2011-12-19 03:53 PM - Werner Macho

- Resolution set to fixed

- Status changed from Resolved to Closed

backported to 1_7 and 1_8 for upcoming release 1.7.4 and possible 1.8.0 in commit 2001cc6008ca0b890d18ffabc01e10a022ed8028
so closing for now
