

QGIS Application - Bug report #465

WMS server: Nasa connection does not work

2006-12-18 02:51 AM - Redmine Admin

Status:	Closed	
Priority:	Low	
Assignee:	Tim Sutton	
Category:	C++ Plugins	
Affected QGIS version:		Regression?: No
Operating System:	All	Easy fix?: No
Pull Request or Patch supplied:		Resolution: invalid
Crashes QGIS or corrupts data:		Copied to github as #: 10524
Description		
If I choose the Nasa connection in the "Add WMS server" plugin and I try to connect to it I can't see any layers.

- Resolution set to invalid
- Status changed from Open to Closed

The nasa connection works fine for me. I suggest you try them again. A wms map relies on lots of other things (network, operating wms computer, etc), any of which can temporarily cause a wms layer to not be available.

I assume that you took note of the warning about needing to set the proxy if your computer is behind a firew
