QGIS Application - Bug report #466
WinQGIS: problem with Lizardtech WMS server

2006-12-18 02:57 AM - anonymous -

Status:	Closed			
Priority:	Low			
Assignee:	Tim Sutton			
Category:	C++ Plugins			
Affected QGIS version:		**Regression?:**	No	
Operating System:	Windows	**Easy fix?:**	No	
Pull Request or Patch supplied:		**Resolution:**	invalid	
Crashes QGIS or corrupts data:		**Copied to github as #:**	10525	

Description

If I choose Lizardtech server I can see the layers but when I load one of this I can not see it, the pointer became a waiting pointer and after several time an output message says:

Could not draw Lizardtech server because:
Network timed out after 120 seconds of inactivity.
This may be a problem in your network connection or at the WMS server.
Tried URL:

http://wms.lizardtech.com/lizardtech/iserv/ows?SERVICE=WMS&VERSION=1.1.0&REQUEST=GetMap&BBOX=-126.00
000,16.999722,-63.999722,50.000000&SRS=EPSG:4326&WIDTH=906&HEIGHT=483&LAYERS=usa_srtm&STYLES=&
YLES=&FORMAT=image/png&TRANSPARENT=TRUE

History

#1 - 2006-12-18 03:02 AM - lami-faunalia-it -

The same problem is present with DM Solution GMap while the NASA connection is not available.

#2 - 2006-12-18 11:16 AM - Gavin Macaulay -

- Resolution set to invalid

- Status changed from Open to Closed

I suggest you contact Lizardtech, as this is not a problem with qgis.

The nasa and dm solutions connections work fine for me. I suggest you try them again.

I assume that you took note of the warning about needing to set the proxy if your computer is behind a firewall.
