QGIS Application - Bug report #4793
Geography columns not seen with "only look in geometry_columns" off

2012-01-11 09:44 PM - Sandro Santilli

Status:	Closed		
Priority:	Normal		
Assignee:	Jürgen Fischer		
Category:	Data Provider/PostGIS		
Affected QGIS version:	1.7.3	**Regression?:**	No
Operating System:		**Easy fix?:**	No
Pull Request or Patch supplied:	No	**Resolution:**	fixed
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	14648

Description

This is a funny one: 1.7.4 fails to *see* tables with a geography column when "only look in geometry_columns" is off.

It sees it just fine when the option is on, and can also load it!

History

#1 - 2012-09-04 12:10 PM - Paolo Cavallini

- Target version set to Version 2.0.0

#2 - 2012-10-17 01:25 PM - Sandro Santilli

- Resolution set to fixed

- Assignee set to Jürgen Fischer

In 1.8.0 the behavior is that you get a "Detecting..." label in the "type" column of the layer selection dialogue.

It is fixed in trunk as of fa845883f0bdeb9d218a2dfc91f900db13470dab (but it's been fixed for a long time, dunno by which commit exactly)

#3 - 2012-10-31 02:52 PM - Sandro Santilli

- Status changed from Open to Closed

I can't reproduce anymore with 1.8.0, assuming fixed
