Description

QGIS crashes (program closes) when attempting to add a new shapefile layer or when trying to open an existing project. I started experiencing this with QGIS 1.7.3 (wroclaw) and also an older installation of QGIS 1.0.0. The problem persisted after uninstalling QGIS 1.7.3 and installing QGIS 1.9 (latest development build). Please find below the problem report:

Not confirmed here. Must be a local problem. Please try with a clean install, no cruft around.

Following the backtrace is might be a wrong encoding selected in "Add vector layer". With commit:89306335ae6a6dda262f6184d350b44ca6a6192b (master) QGIS now retrieves the available codec list from Qt instead of using a hardwired list and falls back to "System" if a unavailable codec is requested. Please test and report.
