

QGIS Application - Bug report #4804

Raster OTFR does not work after adding a layer and causes crash on Windows

2012-01-13 07:36 AM - Giovanni Manghi

Status:	Closed	
Priority:	High	
Assignee:		
Category:	Rasters	
Affected QGIS version:	master	Regression?: No
Operating System:	Windows	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: duplicate
Crashes QGIS or corrupts data:	Yes	Copied to github as #: 14656
Description		
Steps:		
- open a new project		
- add the attached raster (EPSG 3763)		
- open project properties and set project CRS to 3763 and select OTFR, click ok		
- the raster will disappear from the canvas: using "zoom to layer" has no effect on Linux and causes QGIS to crash on Windows/OSGeo4W		
tested on master		

History

#1 - 2012-01-13 07:39 AM - Giovanni Manghi

PS

if you do the other way (set before 3763 as project CRS, enable OTFR and after add the raster) it works fine.

#2 - 2012-01-14 11:40 AM - Giovanni Manghi

- Resolution set to duplicate
- Status changed from Open to Closed

It is a general issue of qgis-master, and was first spotted in #4748.
