

QGIS Application - Bug report #4871

Allow decimal degrees in Print composer

2012-01-24 12:35 PM - Pierre-Luc Auclair

Status: Closed	
Priority: Normal	
Assignee:	
Category:	
Affected QGIS version: master	Regression?: No
Operating System:	Easy fix?: No
Pull Request or Patch supplied: No	Resolution: duplicate
Crashes QGIS or corrupts data: No	Copied to github as #: 14699
Description	
<p>I often work on maps in different software, many times I will have to overlay data to existing maps. Most of the time, the rotation that the original map had falls between integers and should be set using decimal places.</p> <p>It would be useful to allow this as this would increase workflow and reduce annoyances quite a bit. I consider this a bug as it's an hinderance when you are aiming at precision.</p> <p>Thanks !</p>
