## WMS layer 'Add' button in wrong place

<b>Description</b>	
<p>The 'Add' button to add a WMS layer is outside the 'Layers' tab, and so visible from the 'Server search' tab. Since it doesn't apply to servers it shouldn't be visible from there - clicking it adds whatever layer happens to be highlighted in the non-visible 'Layers' tab at the time.</p> <p>I would just stick the Add button into the Layers tab (and possibly the order tab?).</p>
