QGIS Application - Bug report #4913
QGIS freezes when pasting text into the field calculator new expression builder

2012-01-30 05:47 AM - Giovanni Manghi

Status:	Closed		
Priority:	Normal		
Assignee:	Nathan Woodrow		
Category:	Vectors		
Affected QGIS version:	master	**Regression?:**	No
Operating System:		**Easy fix?:**	No
Pull Request or Patch supplied:	No	**Resolution:**	fixed
Crashes QGIS or corrupts data:	Yes	**Copied to github as #:**	14720

Description

On master I'm noticing the following:

if I open the field calculator and I try to paste text into the expression builder (copied from an external application, like gedit or evolution), then QGIS freezes. Sometimes it regain life after a few minutes, more often it stops completely, cpu at 100% and killing the program is the only way out.

History

- Assignee changed from neteler-itc-it - to Nathan Woodrow

Actually I'm also noticing that is freezing by just doing simple things as adding a function. Not sure at this point is a local problem or not. I'll test more and close this ticket if it turns out to be invalid.

#2 - 2012-01-30 06:09 AM - Giovanni Manghi

- File teste1_shp.zip added

weird, it does certainly happen with the attached vector.

#3 - 2012-01-30 09:59 PM - Nathan Woodrow

hmm very strange. Seems it's related to the syntax highlighting. If I get rid of the highlighting it doesn't lock up. Other data sets don't have this behavior.

#4 - 2012-01-31 02:20 AM - Martin Dobias

- Resolution set to fixed

- Status changed from Open to Closed

Fixed in commit:f854acb1

btw. Giovanni your shapefile has a column without a name :)

#5 - 2012-01-31 02:21 AM - Giovanni Manghi

> *btw. Giovanni your shapefile has a column without a name :)*

yes, it is another problem of the new field calculator (I already filed a ticket).
