Category:	
Affected QGIS version: master	Regression?: No
Operating System:	Easy fix?: No
Pull Request or Patch supplied:	Resolution:
Crashes QGIS or corrupts data:	Copied to github as #: 14736
Description	
<p>Setting the font size of a label in the print composer is currently restricted to the font-size chosen in "Settings" --> "Options" --> "General" --> "Menu size"</p> <p>This is probably a regression introduced from the new feature allowing to set the font-size in menus and dialogues.</p> <p>Thanks!</p>
