

QGIS Application - Bug report #4973

QGIS creates ill-formatted DXF files

2012-02-09 02:26 AM - zirneklitis -

Status: Closed	
Priority: High	
Assignee:	
Category: Vectors	
Affected QGIS version: 1.7.3	Regression?: No
Operating System:	Easy fix?: No
Pull Request or Patch supplied: No	Resolution: upstream
Crashes QGIS or corrupts data: No	Copied to github as #: 14761

Description

The QGIS creates DXF files with wrong extent values, e.g.,:

\$EXTMIN

10
30.0
20
49.75
30
0.0
9

\$EXTMAX

10
130.5
20
163.1318914119703
30
0.0
9

In fact, for given example, the numbers should be as follows:

\$EXTMIN

10
290240.0
20
159640.0
30
0.0
9

\$EXTMAX

10
785180.0
20
452180.0
30
0.0
9

There is problem to import such an ill-formatted file in drawing programs, as OOo.Draw, Inkscape or CoreIDRAW.

Tested on QGIS 1.7.1, 1.7.3 and 1.9.90

History

#1 - 2012-04-16 05:02 AM - Giovanni Manghi

- Resolution set to upstream
- Status changed from Open to Closed

QGIS uses OGR to write DXf files, if something wrong happens, then is OGR problem.
