I have the same problem with the 0.8 release and the crash log says :

\_Date/Time: 2007-01-03 11:49:14.967 +0100

OS Version: 10.4.8 (Build 8N1106)

Report Version: 4

Command: qgis

Path: /Applications/qgis.app/Contents/MacOS/qgis

Parent: [[WindowServer]] commit:e5dcf76d (SVN r58)

Version: 0.8.0 (6361) (0.8.0)

PID: 256

Thread: Unknown

Link (dyld) error:

Symbol not found: +ZN14QgsRasterLayer21setSubLayerVisibilityERK7QStringb

Referenced from: /Applications/qgis.app/Contents/MacOS/lib/libqgis\_raster.1.dylib

Expected in: flat namespace\_

It seems to be a problem with a included lib

Cheers

Lucien

Hi All

I have the same problem, can't start up and same error message with the missing lib.

Best regards, Robert
