

## QGIS Application - Feature request #5056

### Allow labeling based on query

2012-02-19 05:51 PM - Aren Cambre

<b>Pull Request or Patch supplied:</b>	<b>Resolution:</b> duplicate
<b>Easy fix?:</b> No	<b>Copied to github as #:</b> 14826
<b>Description</b>	
<p>I would like labeling to allow me to specify a query to determine which items get a label.</p> <p>For example, I am displaying a map of places from TIGER. I would like to display everything--cities, villages, towns, and census-designated places (CDPs)--but I would like to only label CDPs.</p> <p>The only way I can see to do this now is to create two layers from the same datasource and only label one layer.</p>
