

QGIS Application - Bug report #5075

Qgis crashes in Raster calculator

2012-02-23 03:37 AM - Riccardo Mattiuzzo

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	Rasters	
Affected QGIS version:	master	Regression?: No
Operating System:	Debian GNU/Linux	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: worksforme
Crashes QGIS or corrupts data:	Yes	Copied to github as #: 14842
Description Qgis (I'm using version 1.9.90-Alpha apt-get updated from nightly build this morning) crashes in this situation: I choose Raster Calculator (from main menu Raster->Raster Calculator) and make no selections or calculations. I just press OK button and Qgis kicks me out to the operating system.

raster calculator: exit on error (fix #5075)

History

#1 - 2012-02-23 03:41 AM - Paolo Cavallini

Possibly related: with an empty project, the same operation does not crash QGIS, but loads on the canvas a .tif raster, all NULL

#2 - 2012-04-16 03:52 AM - Giovanni Manghi

- Status changed from Open to Feedback

Cannot confirm on master and both linux and windows. Can you upgrade and try again?

#3 - 2012-05-30 03:38 AM - Giovanni Manghi

- Resolution set to worksforme

- Status changed from Feedback to Closed

closing for lack of feedback, reopen if necessary.

#4 - 2014-02-21 03:11 AM - Joshua Vande Hey

- Status changed from Closed to Reopened

This appears to continue to be an error on QGIS desktop 2.0.1 on windows. If you go to the raster calculator and press okay without entering anything anything the program crashes.

it seems fixed in qgis master (that will become qgis 2.2 tomorrow).
