

QGIS Application - Feature request #5076

Add option "Remove from disk" to legend layer menu

2012-02-23 09:09 AM - Riccardo Mattiuzzo

Status:	Open	Resolution: Copied to github as #: 14843
Priority:	Low

Pull Request or Patch supplied:	Not supplied	
Easy fix?:	No	
Description		
<p>This issue is reported only as a new feature request.</p> <p>When I want to remove a layer from Layer panel (at the moment) I have only "remove" option.</p> <p>This is ok if I want to keep that layer.</p> <p>Unfortunately if I'm in a testing phase of my task and I have to produce several testing layers I can remove them from Qgis with "remove" option but they still reside on the disk. It's quite annoying later to look for these files and remove physically from disk.</p> <p>Is is possible to add a "Remove from disk" option when I right click on layer?</p> <p>Thank you in advance.</p>

- It's OK for QGIS Browser, but it is very, very bad and dangerous idea for Quantum GIS Desktop.
