

QGIS Application - Bug report #5085

Font size is not correctly exported to SVG/PDF

2012-02-24 10:40 AM - Anita Graser

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	Map Composer/Printing	
Affected QGIS version:	master	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:		Resolution: fixed/implemented
Crashes QGIS or corrupts data:		Copied to github as #: 14851
Description		
<p>This is easily reproducible by adding a label to print composer layout in a given font, e.g. Arial 10. After exporting to SVG and opening in Inkscape, the font is specified as Arial 12,398 there.</p> <p>Export to image seems to preserve the correct font size.</p>

- Status changed from Open to Feedback

Hello, bug triage...

on QGIS 2.13 master, the SVG conversion of a label in DejaVu Sans 10 gives a DejaVu Sans 9,9188 in Inkscape which seems correct, isn't it ?

- #6 - 2015-12-08 07:37 AM - Anita Graser
- Resolution set to fixed/implemented
- Status changed from Feedback to Closed

Yes, the font size seems correct now. Thanks for checking!
