<b>Description</b>	
<p>Hi all,</p> <p>I'm working with a tilecache server, and I use QGIS to load some layers from it in WMS.</p> <p>In QGIS status bar I have always "0 cache hits", also when I opened a view for which QGIS has just generated the cache files (I view them in QGIS cache folder).</p> <p>Is it only a "label" problem or QGIS not load the available cache files?</p> <p>I have made my test with QGIS 1.7.4 for Windows and Tilecache 2.11.</p> <p>Thank you,</p> <p>Andrea</p>	

### Associated revisions

**Revision bb623a8c - 2012-08-18 01:17 PM - Jürgen Fischer**

- extend support for user defined network timeout to QgsNetworkAccessManager
- support for user defined tile expiration time for WMTS/WMS-C tiles (fixes #5104)
