QGIS Application - Bug report #512
Georef of swiss raster layer does'nt work on win XP

2007-01-05 02:33 AM - Gilles -

Status:	Closed		
Priority:	Low		
Assignee:	Magnus Homann		
Category:	Projection Support		
Affected QGIS version:		**Regression?:**	No
Operating System:	Windows	**Easy fix?:**	No
Pull Request or Patch supplied:		**Resolution:**	fixed
Crashes QGIS or corrupts data:		**Copied to github as #:**	10571

Description

I tried several times to georef a map in Q gis 0.8 (Projection ID: 2418, 2419, 1200 1201 &57) but it never displayed the map, an shows aberations in the scale and cordinate bar. I also tried to load a map I georeferanced with qgis last version. It displays the map, but the coordinates ant the scale are wrong.

Thanks for the attention you pay to this message.

Could you supply us with information about the raster file you're using (TIFF, JPG, other)?

When you load the map, what is the layer projection@?

What is the project projection?

Is projection turned on?

The best is iof you can supply us with the raster data.

- Resolution set to fixed

- Status changed from Open to Closed

Worksforme in 0.8.1 (/ commit:b6b92c9b (SVN r6451)). If any more info is available, I'm glad to re-open (see above).

#3 - 2009-08-22 12:51 AM - Anonymous

Milestone Version 0.8.1 deleted
