QGIS Application - Bug report #5136
Styles saved as QML if filename don't have .sld suffix

2012-03-08 05:00 AM - Alexander Bruy

Status:	Closed			
Priority:	Normal			
Assignee:	Giuseppe Sucameli

Affected QGIS version:	master	**Regression?:**	No	
Operating System:		**Easy fix?:**	No	
Pull Request or Patch supplied:		**Resolution:**		
Crashes QGIS or corrupts data:		**Copied to github as #:**	14894	

Description

Saving style to SLD only possible if I manually add suffix .sld to filename in save dialog. When file type selected from combobox and filename specified without extension QGIS always saved style as QML, even if SLD is selected using combobox

Tested under Slackware Linux 13.37, QGIS 1.9.90 c285502

This problem is due to a QT issue...

A solution may be to use a non-native QFileDialog but it should be avoided.

A workaround could be adding a popup menu with two items (Save as QML, Export to SLD) to the "Save Style" button.
