

QGIS Application - Bug report #5172

When a memory layer is "saved as" a shapefile, any null values in the attribute table are converted to zeros

2012-03-13 03:11 PM - Alister Hood

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	Data Provider	
Affected QGIS version:	master	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:		Resolution:
Crashes QGIS or corrupts data:		Copied to github as #: 14919
Description		
<p>What the subject says. I don't know if this is really a data provider plugin, or what.</p> <p>I haven't tested if the same problem occurs saving to shapefile from other formats.</p> <p>Note that QGIS does support null values in shape files - you can load the resulting file and delete the zeros manually.</p>
