

QGIS Application - Bug report #5172

When a memory layer is "saved as" a shapefile, any null values in the attribute table are converted to zeros

2012-03-13 03:11 PM - Alister Hood

<b>Status:</b>	Closed

<b>Crashes QGIS or corrupts data:</b>		<b>Copied to github as #:</b> 14919
<b>Description</b>		
<p>What the subject says. I don't know if this is really a data provider plugin, or what.</p> <p>I haven't tested if the same problem occurs saving to shapefile from other formats.</p> <p>Note that QGIS does support null values in shape files - you can load the resulting file and delete the zeros manually.</p>
