

QGIS Application - Bug report #5189

Ability to select & remove multiple symbologies in Syle panel of Properties

2012-03-16 07:31 AM - belg4mit -

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	GUI	
Affected QGIS version:	1.7.4	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:		Resolution: fixed
Crashes QGIS or corrupts data:		Copied to github as #: 14931
Description		
<p>Barring the existence of a QUERY panel that would allow one to write SQL to select the correct records, one's best option is to selectively style the desired records in a large layer. Unfortunately, the style panel does not allow one to use the the delete key on the keyboard to remove a style, or have a context menu for style items, nor even to select multiple styles to remove with the delete button. Instead one must bounce back and forth between selecting a style and hitting the delete button, most tedious and inefficient :-/</p>		

History

#1 - 2012-03-16 07:37 AM - Giovanni Manghi

- Status changed from Open to Rejected
- Resolution set to invalid

multiple style classes selection and context menu (to change transparency,colour and unit) is available in qgis-master.

#2 - 2012-03-16 07:52 AM - Nathan Woodrow

- Resolution deleted (invalid)

Giovanni don't be so hasty, this is related to deleting items not multiple styling of items.

Deleting more one item is still not supported even in master, so this bug report is valid. Please reopen.

#3 - 2012-03-16 07:54 AM - Giovanni Manghi

- Status changed from Rejected to Reopened

Jump into a graduated renderer and classify some items, now select more than one item and click the delete button. Only the top one is removed.

ah! ok ;) I believe that there may be already a ticket filed about this issue.

#6 - 2012-09-04 12:08 PM - Paolo Cavallini

- *Target version set to Version 2.0.0*

#7 - 2013-09-22 03:22 AM - Giovanni Manghi

- *Resolution set to fixed*

- *Status changed from Reopened to Closed*

this is fixed, at least in qgis 2.0.
