QGIS Application - Bug report #5197
Feature connectivity breaks in "project on the fly" editing

2012-03-18 03:15 AM - Oleg Seliverstov

Status:	Closed			
Priority:	Normal			
Assignee:				
Category:				
Affected QGIS version:	1.7.4		**Regression?:**	No
Operating System:			**Easy fix?:**	No
Pull Request or Patch supplied:			**Resolution:**	invalid
Crashes QGIS or corrupts data:	No		**Copied to github as #:**	14937

Description

There are micro-breaks into geometry connectivity when non-projected data edited in "project on the fly" and "snapping" mode. Could you please review it? Thanks!

I'm not sure what this mean and how I would try to replicate the issue. Can you try explain better (a step by step procedure would be great) and/or add sample data/screenshot/screencast?

#2 - 2012-09-04 12:08 PM - Paolo Cavallini

- Target version set to Version 2.0.0

#3 - 2013-09-22 03:18 AM - Giovanni Manghi

- Resolution set to invalid
- Status changed from Open to Closed

closing for lack of feeback, without a better description it is not possible to make the necessary checks. Reopen if necessary, eventually after testing qgis 2.0
