| <p>Hi,</p> <p>I just tested qgis-server (master) under Windows/Osgeo4w.</p> <p>I noticed that works all ok when using absolute paths. If relative paths are used then I see the following:</p> <p>shapefiles vectors are not listed among the available layers</p> <p>tiff are listed among the available layers and is possible to add them (to a project), but then are not rendered.</p> |                   |                              |
