<b>Description</b>		
<p>Hello all,</p> <p>this is a feature request for qgis server. It would be very useful to have relative paths in qgis server in order to make portable projects. The main problem is that usually the server has different configuration from the working machine, usually the server being a headless machine. Often different OS are used.</p> <p>Thank you</p>

Relative paths are already supported. What version/platform are you using?

#2 - 2012-03-18 03:25 PM - bradypus -

I was reading old tutorial perhaps.

Relative paths are working fine, thank you
