My projects use multiple geometry columns for each table, and I've noticed the geometry column having different sortings.

So naturally, please update qgis/src/app/qgsdbsourceselect.cpp:

```
558c558
<      "order by f_table_schema,f_table_name";
---
>      "order by f_table_schema,f_table_name,f_geometry_column";
```
