| Crashes QGIS or corrupts data: | No | Copied to github as #: 14944 |
| Description | | |
| <p>Works randomly with errors like "IndexError: index out of range for array" or the resulting tiff has the wrong reference/projections, I think it depends on the OTFR setting or if other conversions were made before. I get better results with the 8bpp-google-png image than the SRTM one. Can someone can confirm this ?.</p> <p>QGIS1.7.4</p> | | |
