

QGIS Application - Bug report #5210

QGIS freezes when editing via WFS-T

2012-03-20 11:46 AM - Magnus Nilsson

Status:	Closed		
Priority:	Normal		
Assignee:			
Category:	Web Services clients/WFS		
Affected QGIS version:	1.7.4	Regression?:	No
Operating System:	Windows Vista 64 bit	Easy fix?:	No
Pull Request or Patch supplied:	No	Resolution:	
Crashes QGIS or corrupts data:	No	Copied to github as #:	14947
Description			
I add a WFS and go into edit mode. QGIS freezes when I edit a node in a line from a GeoServer localhost WFS and try to exit edit mode.

Can you please give a try to qgis-dev using osgeo4w? thanks.

#2 - 2012-03-21 12:42 PM - Magnus Nilsson

I have tried with 1.9.90-alpha (qgis-dev) and I can confirm that the same problem occurs here as well. In fact, when I force quit QGIS, I am unable to add a WFS in QGIS again. If I log out of Windows and log in again, I am able to add the same WFS.

can you post a public URL that causes the issue?

#4 - 2012-03-21 12:51 PM - Magnus Nilsson

I use <http://localhost:8080/geoserver/wfs> from GeoServer 2.1.3, so it isn't a public URL.

do you know a public server that causes the issue and that can help the devs to track the problem?

#6 - 2012-03-22 02:57 AM - Magnus Nilsson

No, I don't. I use a fresh installation of GeoServer 2.1.3. I tried with a few of the standard layers and got the same error. It should be fairly easy to reproduce.
