

QGIS Application - Bug report #5225

Error for labeling with rule based renderer

2012-03-23 07:06 AM - Otto Dassau

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	Labelling	
Affected QGIS version:	1.7.4	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: fixed
Crashes QGIS or corrupts data:	No	Copied to github as #: 14961
Description		
<p>Hi,</p> <p>I have a point shape layer with street names. The field 'name' often only contains the word "Weg" and I don't want to see this on the map.</p> <p>If I select categorized rendering based on column 'name' and remove the category "Weg", the points and labels for "Weg" are invisible - fine.</p> <p>If I use rule-based rendering with the filter NOT name = 'Weg', the points for "Weg" are invisible, but I can still see the labels. Since I want to use the rule-based renderer, can someone tell, if this is a bug or if I do something wrong? Attached you find a test shape file to reproduce.</p> <p>Thanks a lot</p> <p>Otto</p>		

History

#1 - 2012-03-26 12:30 AM - Otto Dassau
- Affected QGIS version changed from master to 1.7.4
- Target version set to 35
#2 - 2012-04-15 10:00 AM - Giovanni Manghi
- Target version changed from 35 to Version 1.8.0
#3 - 2012-09-04 11:53 AM - Paolo Cavallini
- Target version changed from Version 1.8.0 to Version 2.0.0
#4 - 2013-09-22 02:02 AM - Giovanni Manghi
- Resolution set to fixed
- Status changed from Open to Closed
seems fixed, at least in qgis 2.0.
