Show all layers/Hide all layers changed behaviour in QGIS master

Status:	Closed	
Priority:	Normal

Category:	Map Legend	
Affected QGIS version:	master	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: fixed
Crashes QGIS or corrupts data:	No	Copied to github as #: 14975
Description		
Yet in QGIS 1.7.4 Show all layers/Hide all layers is fast lightining as all layers are switched off and on at the same time. In QGIS master this seems to have changed, and now layers seems to be switched off and on one by one, resulting in a considerably slower operation.
