

QGIS Application - Bug report #5284

MS SQL features disappear if SQL errors on insert

2012-04-02 09:59 PM - Nathan Woodrow

<b>Status:</b>	Closed	
<b>Priority:</b>	High	
<b>Assignee:</b>	Tamas Szekeres	
<b>Category:</b>	Data Provider	
<b>Affected QGIS version:</b>	master	<b>Regression?:</b> No
<b>Operating System:</b>	Windows	<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b>	No	<b>Resolution:</b> fixed
<b>Crashes QGIS or corrupts data:</b>	No	<b>Copied to github as #:</b> 15004
<b>Description</b>		
<p>If you are saving a feature and the database fails to insert due to a SQL error the feature will disappear with no error to tell the user what has happened.</p> <p>The PostGIS provider throws a error and blocks the save operation until the user has fixed the mistake, letting the user try to save again after the changes have been made.</p>
