

QGIS Application - Bug report #5303

SQL Server new provider , select fails

2012-04-04 08:59 AM - Eric Mariage

<b>Status:</b>	Closed	
<b>Priority:</b>	Normal	
<b>Assignee:</b>	Tamas Szekeres	
<b>Category:</b>	Data Provider	
<b>Affected QGIS version:</b>	master	<b>Regression?:</b> No
<b>Operating System:</b>		<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b>	No	<b>Resolution:</b> worksforme
<b>Crashes QGIS or corrupts data:</b>	No	<b>Copied to github as #:</b> 15009
<b>Description</b>		
<p>Using the new SQL server provider with geometry table, it's not possible to have the attribut datas in the window 'attribut table' of QGIS. We got only "ERROR" on every row.</p> <p>It's not possible to select on feature on the map, if we click on one all features are selected.</p> <p>We try several SQL server table and got always the same problem.</p>		

History

#1 - 2012-04-05 06:28 AM - Eric Mariage

The problem comes from a column in uniqueidentifier. The only format for the key seems to be integer.

#2 - 2012-04-11 11:29 AM - Tamas Szekeres

- Assignee set to Tamas Szekeres

#3 - 2012-04-12 05:30 AM - Tamas Szekeres

- Status changed from Open to Feedback

Feature id in QGIS can only be 64 bit in size. The SQL uniqueidentifier type (which is 16 bytes) not sufficient for this purpose. Use int or bigint data types for the feature id column.

#4 - 2012-06-16 03:49 AM - Jürgen Fischer

- Resolution set to worksforme

- OS version deleted (1.9.90)

- Status changed from Feedback to Closed

seems solved - closing for the lack of feedback
